

Nome: _____

INFORMAÇÃO: _____

Data: __/__/__

1 - Escreve, para cada caso, frações decimais equivalentes. Observa o exemplo.

$$\frac{4}{10} = \frac{40}{100} = \frac{400}{1000}$$

$$\frac{12}{10} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{25}{100} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{34}{100} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{7}{10} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} = \frac{30}{100} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} = \underline{\hspace{2cm}} = \frac{1600}{1000}$$

$$\underline{\hspace{2cm}} = \underline{\hspace{2cm}} = \frac{2800}{1000}$$

2 - Escreve para cada caso, frações equivalentes, multiplicando, sucessivamente, ambos os termos da fração por 10. Observa o exemplo.

$$\frac{3}{5} = \frac{30}{500} = \frac{300}{5000}$$

(Arrows indicate multiplication by 10: 3 to 30, 5 to 500, 30 to 300, 500 to 5000)

$$\frac{2}{4} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{5}{9} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{5}{25} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{4}{50} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{24}{12} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{50}{91} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{15}{75} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{70}{30} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{40}{80} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$
